Wi-Fi

Allowed types

Question:
Which types are allowed when in the SSID and in the password settings?

Answer:
- SSID: "ABCDEFGHIJKLMNOPQRSTUVWXYZabcdefghijklmnopqrstuvwxyz1234567890'+-_ ()[]{}!."
- Pwd: "ABCDEFGHIJKLMNOPQRSTUVWXYZabcdefghijklmnopqrstuvwxyz1234567890'+-_()[]{}$£!?^#@*\\\"=~.:;/%%"

The "space" type is an exception: it can be used but not as first type in SSID name, because it causes software incomprehension in a few Windows versions.
